

OCSAccess™ 16 Great Features:

Customer-Specific Pricing

1

Our online stores always utilize customer-specific pricing. No matter how your pricing is setup in your VMS, your online store will mirror it!

Backend Integration

2

We offer the only online ordering solution fully integrated into many of the existing industry backend systems.

- * Real-time order creation in your VMS.
- * Seamless customer, product and pricing info comes from your VMS.

Manage Multiple Locations

3

Manage online ordering for multiple locations with a single customer login. Our centralized purchasing feature allows customers to manage purchasing for all locations and prevent order duplication.

Limit Products Ordered

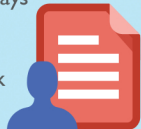

4

Limit ordering to a subset of products based on customer requirements. You can choose to show or hide these items from view on your website.

Customer Price Sheets

5

Our 'quick order' page displays your customers' standing order or price sheet items in one place, making it quick and easy for them to find & order the items they need.

Delivery Date Integration

6

Delivery dates are generated based on the customer route schedule in your VMS.

Includes emailing customers when it is time to place an order!

Delivery Cut-Off Times

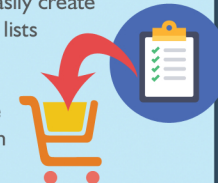

7

Delivery date cut-offs with real-time notifications when customers login. Orders placed after your defined cut-off are automatically rescheduled based on the customer's normal delivery day(s).

Shopping Lists

8

Your customers can easily create and manage their own lists of products for easy retrieval and ordering. These can be used like a wish list or as custom 'quick checkout' lists.

Re-Order From Online History

9

Give customers the ease of re-ordering directly from their past purchases. Recreate an entire order or just specific items.

Unlimited Product Categories

10

Our product catalog allows you to define an unlimited number of product categories. Don't be held back by your VMS's limitations!

Stock Notifications

11

You've invested valuable time and money getting customers to your website. Don't lose out on a sale because the item they want to buy has just sold out. Stock notifications make it easy for customers to quickly sign up for a back in stock email alert.

Express Order Form

12

Our express order form makes it super fast and easy for your customers to place large orders. An entire order can be built from this single page and a single click starts the checkout process.

Unique Cart Designs

13

Our designs make your company stand out! We customize every website to match the look and feel of your current marketing materials. Say goodbye to "cookie cutter" carts.

Ability To Add New Features

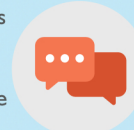

14

Our software is developed 100% in-house. This allows us to provide unlimited support for customization. There is virtually no limit to how far the software can scale or be modified to meet your needs.

Industry-Based Tech Support

15

When you speak to OCS Access, you are speaking to professionals with in-depth knowledge of the OCS, Vending, Water and Food Service industries. We have over a decade of experience serving operators just like you!

No Long-Term Contracts

16

Your OCS Access monthly license fee includes all you need to successfully operate your online ordering system at a low monthly price. Billing is month to month, with no contracts.
